

FARM SAFETY CHECKLIST

Tractors

Date inspected: Inspected by:	OK	NO	If No, document any deficiencies/irregularities and note any remedial actions and date taken
Are farm equipment instructional manuals readily available to operators?			
Are ROPS (roll-over protective structures) and seat belt systems properly installed on all tractors and in working condition?			
Are all tractors and self-propelled machines equipped with a dry chemical fire extinguisher?			
Are farm tractors and other self propelled vehicles always kept in good working order (e.g. periodic brake adjustments, properly inflated tires, hydraulic hoses kept in good condition etc.)?			
Are braking and lighting systems on all powered mobile equipment in proper working order?			
Is the power turned off before machinery is adjusted, repaired or unclogged?			
Are drawbar loads always hitched to a drawbar rather than to the tractor's axle, frame or raised three-point hitch?			
Are doors and windows in buildings always open when vehicles or equipment with internal combustion engines are started or run indoors?
